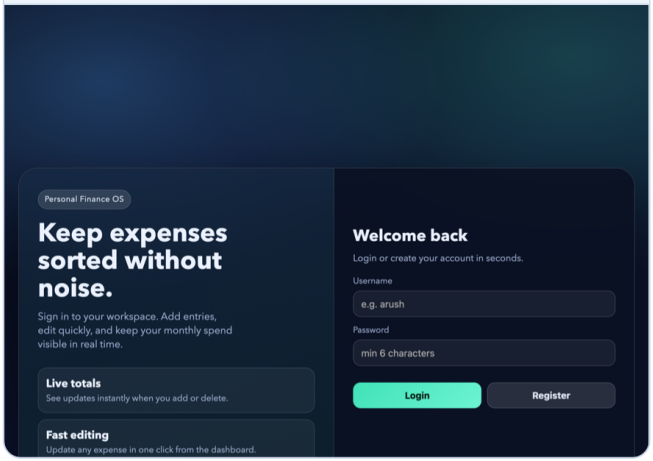
Expense Tracker (Spring Boot + JWT) Architecture

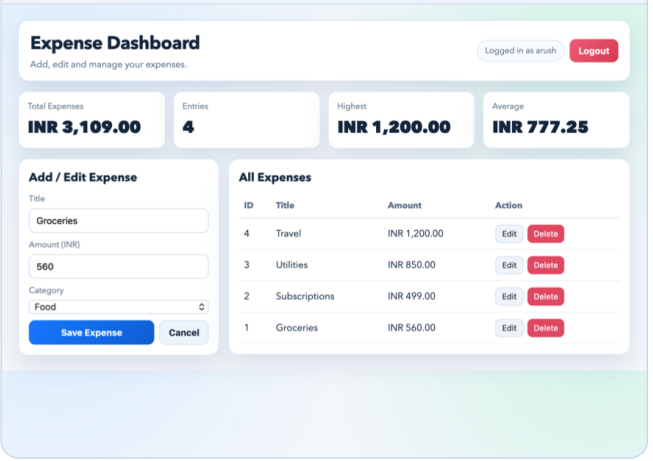
Using actual project UI style/screens for documentation.

UI Screens (Actual Project Theme)

Login Page



Dashboard Page



Back

Controll

AuthCon

Service

AuthServ

Reposit

AppUser

Database Design

app_user

id	username	password
1	arush	bcrypt hash

expense

id	title	amount	user_id
1	Groceries	560.00	1
2	Travel	1200.00	1

Runtime: REST API -> JPA Repositories -> H2/MySQL

System Flow

1. User registration via /
2. User login via **/auth/l**
3. Frontend stores JWT
4. Dashboard calls prote
5. CRUD operations: cre
6. Token validation in Jv

Architecture Ove
